

patCHquilt – The Swiss Quilters Association

patCHquilt was founded in 1989. The association, led by seven members of the board, has developed well. Today it consists of about 1200 members.

It has always been the aim of the association to find new ways to promote patchwork and quilting and to keep our members satisfied by organising national contests and exhibitions as well as reconstructing and working on the quarterly magazine.

Our country is small, yet it has a diverse structure with its four languages. Therefore, most of the articles in our magazine are published in German and French.
