

# Recycling

- From waste to value

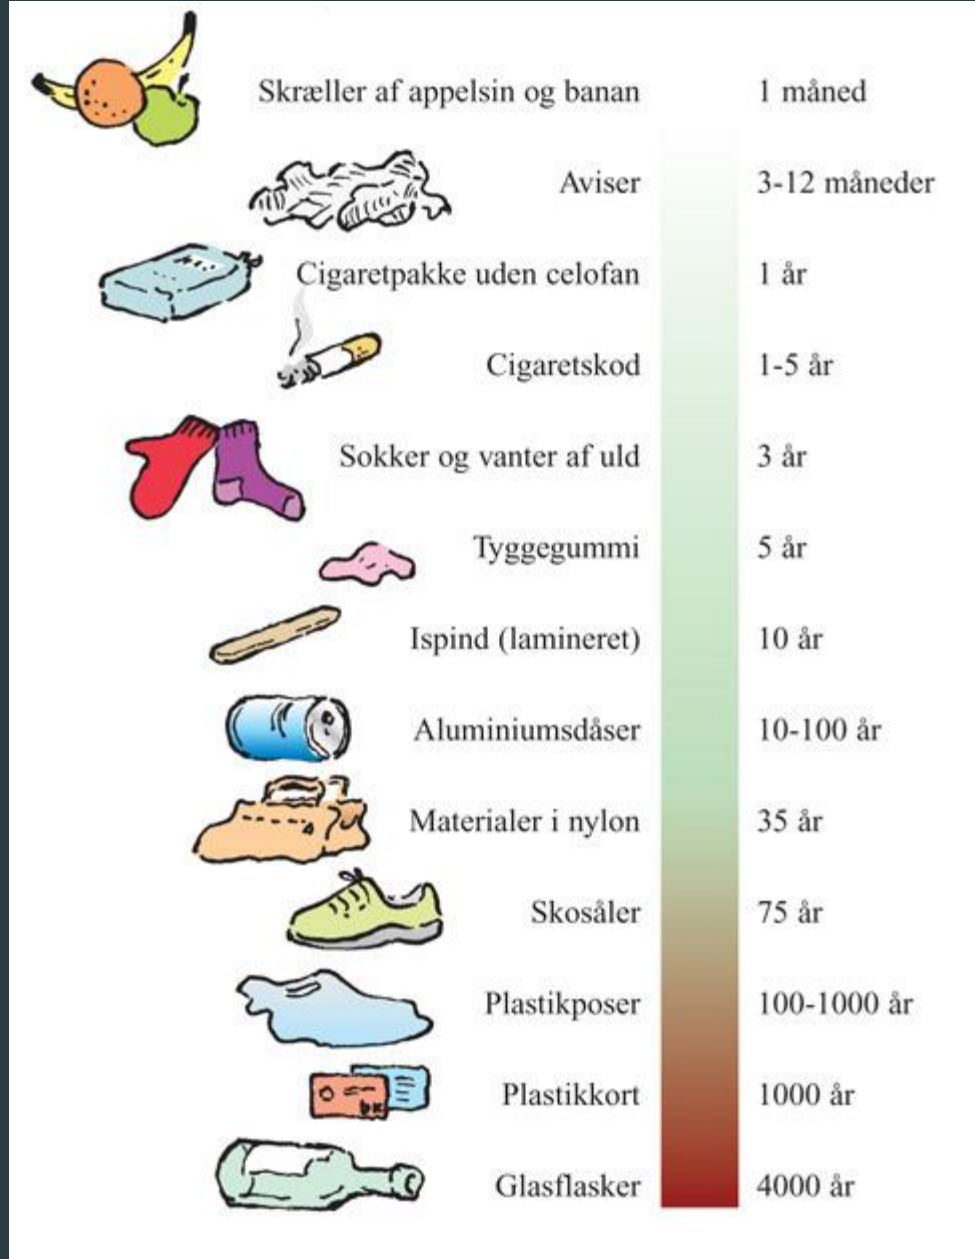

In our class we have been working with recycling.

We wanted to find out if garbage is a problem to the environment or if it can be a useful resource.

# Garbage can be a big problem to the environment:

# Time for decomposing

Can we do more to take care of the environment than to use a wastebin?

# Sorting waste in every classroom

# The recycling-station

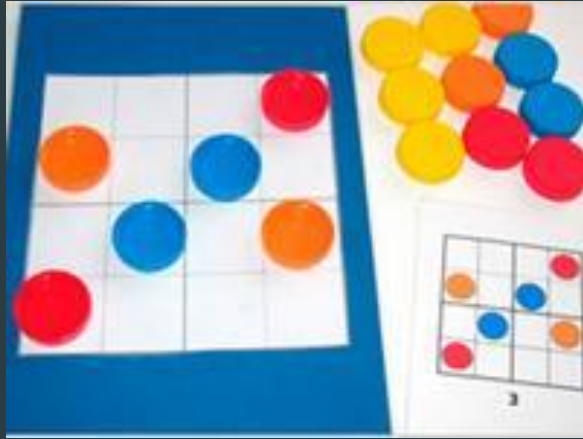

# From lids to new plastic box

# Reusing milk-lids for games and art

# More waste

# Fieldtrip to the recyclingcenter "The Value-park"

# SÅDAN FINDER DU RUNDT I VÆRDIPARKEN

renosyd  
Fra affald til værdi

The garbage is  
sorted in 30  
different sections

# Garbage handled with extra care

# Recycling:

Old  
windowglass  
can be turned  
into new  
windows

Plants turn in a year into compost  
- which you can get for free for your garden

This can be used for new tabeltops

Of this you can make rockwool to isolate houses

This cloth are made out of shampoo-bottles

We ended our visit to "The Value-park"  
knowing that waste sorted and used the  
right way can be a resource:

It is possible to  
turn waste into  
value! 😊

# Made by students out of waste and creativity

## FOOTSTEPS OF SOME ANIMALS
