

ELW 2

OUR ELW 2 COMMAND VEHICLE. COMMUNICATION IN A BIG WAY.

Mounted on MAN and other chassis.

Ziegler

COMMUNICATION REPRESENTS SECURITY.

■ ELW 2

Situations involving several vehicles or organizations call for management and coordination of emergency personnel on site. With ZIEGLER's ELW 2, units can be purposefully guided, thus ensuring optimal cooperation with other authorities and organizations entrusted with security tasks. The command center has access to all information and communication resources for an efficient coordination. Another advantage: ZIEGLER's ELW 2 vehicles can be configured as desired with regard to technical equipment and interior amenities and impress with their rugged design and ample amount of space available.

- 1. Extendable antenna mast mounted on rear of vehicle
- 2. Extendable awning as weather protection
- 3. Space can be configured to suit individual requirements
- 4. Compartment for stowing equipment in lower section
- 5. Ergonomic entry with fold-out steps

OPTIMALLY EQUIPPED FOR EMERGENCIES.

■ GIANT IN TERMS OF TECHNOLOGY

Large-scale emergency situations call for optimum management and coordination. Equipped with the latest radio equipment, multiple PC workstations and a meeting room for up to twelve persons, operations management can focus on their work in the ELW 2.

■ SPACE-SAVING REAR

The antenna mast is mounted on the rear of vehicle in a space-saving manner and can be easily and quickly extended when needed. A mobile satellite system can be optionally mounted on the roof.

■ LEFT SIDE VIEW

Setup options with different chassis. Heavy components are stowed in the lower equipment compartments and can thus be easily removed.

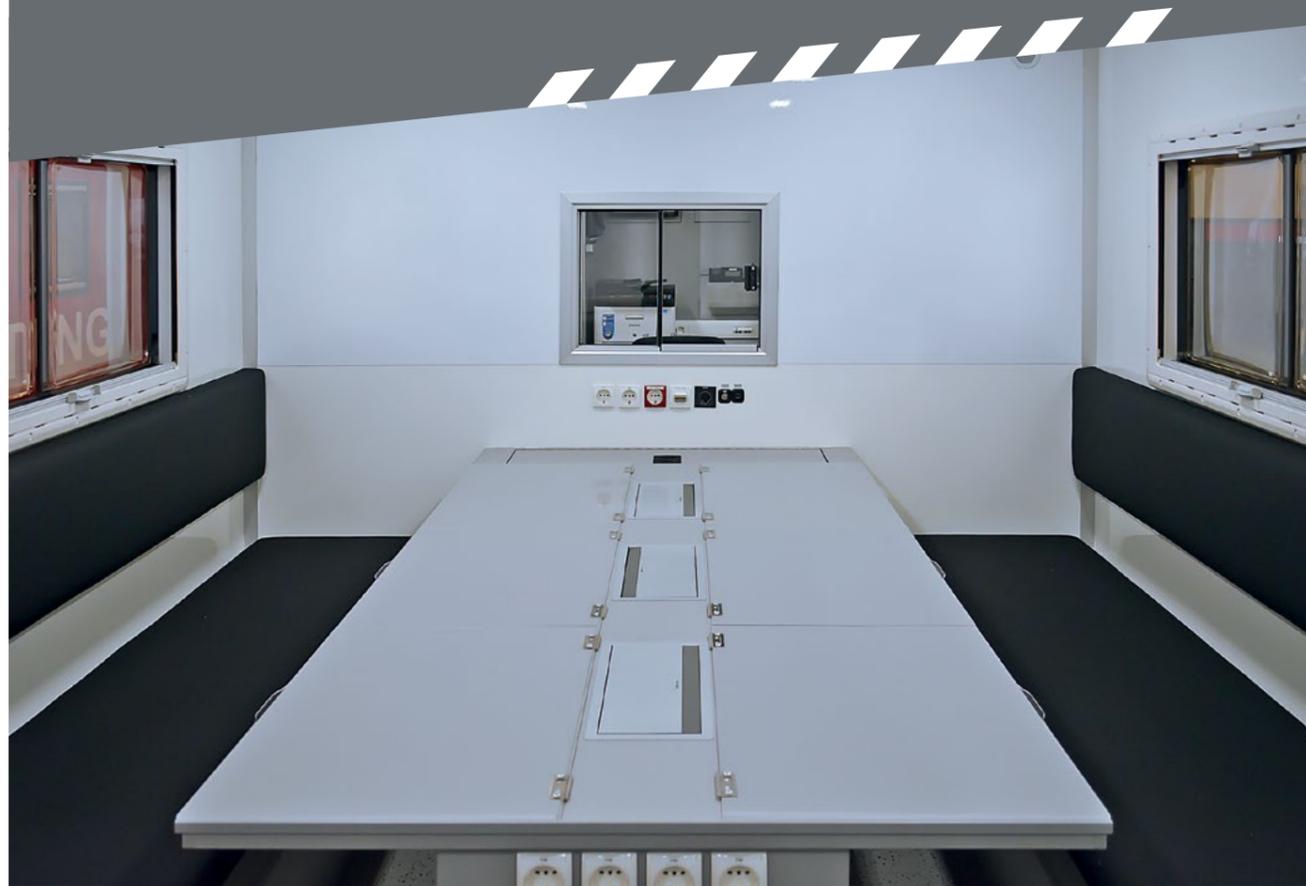

■ LAYOUT CONFIGURED TO YOUR REQUIREMENTS

Interior of ELW 2 can be configured as desired. Communications between individual authorities are ensured with the ideal layout and state-of-the-art radio and telecommunications equipment.

FULLY EQUIPPED AND STATE-OF-THE-ART TECHNOLOGY.

■ **MEETING ROOM:** The meeting table is able to accommodate up to twelve people. Ideal for briefings: a table with folding Plexiglas panels for non-slip placement of geographical maps and documents.

■ **COMMUNICATIONS:** Always connected with the radio room via the meeting room's window.

■ **COMMUNICATIONS ROOM:** Telecommunications at the highest level – four stations are available for communication between the individual security organizations and team managements. With a clear layout, it helps personnel work together.

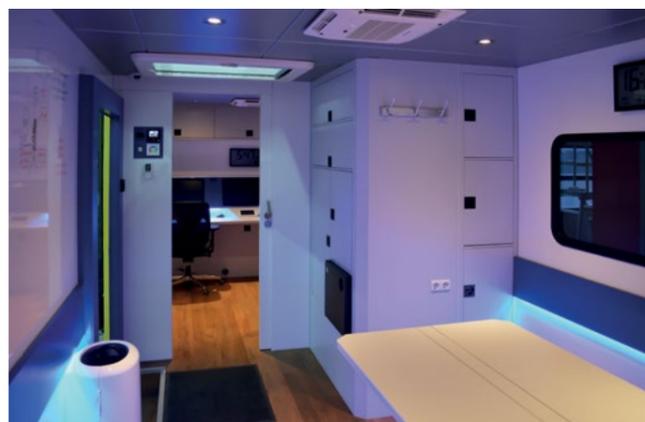

The adjacent meeting room can be used for briefings.

■ **AMPLE STORAGE SPACE:** LOTS OF Space for organizing: Safeguarding against objects falling. Numerous outlets for using electrical devices.

■ **STOWED TO SAVE SPACE:** Steps can be easily pulled out. Space-saving arrangement thanks to simple folding mechanism in the vehicle.

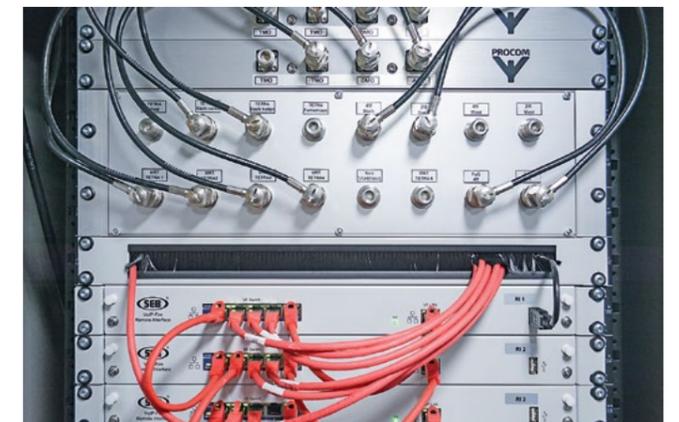

■ **INDIVIDUALLY CUSTOMIZED:** All areas can be setup as desired.

■ **FLOOR COVERING:** Floor spray covering, with edges extending up on side walls – non-slip and easy to clean.

■ **EQUIPMENT COMPARTMENT:** For easy removal – Large storage areas are located close to the ground. The size of the equipment compartments can be individually adapted.

■ **ALWAYS IN TOUCH:** Always prepared – easily accessible communications technology that can be quickly adapted to the situation.

GOOD REASONS TO CHOOSE OUR ELW:

- Safety, durability, and stability thanks to rugged design
- Effective coordination and management of emergency personnel
- State-of-the-art radio and telecommunications technology installed in the vehicle
- Flexible layout: Driver's cab and crew area can be configured individually
- Floor easy to clean thanks to floor covering's edges extending up on walls
