

ELW 1

**OUR ELW 1 COMMAND VEHICLE.
SITUATION UNDER CONTROL – WITH EVERY DEPLOYMENT.**

Mounted on Mercedes Benz and other chassis.

COMMUNICATIONS PROVIDE SECURITY.

■ ELW 1

Situations involving several vehicles call for management and coordination of emergency personnel on site. With ZIEGLER's ELW 1, units can be purposefully guided, thus ensuring optimal cooperation with other authorities and organizations entrusted with security tasks. The command center has access to all information and communication resources for an efficient coordination.

- 1. Antenna mast integratable in the rear trunk
- 2. Special signal system as requested
- 3. Layout configured to suit your requirements
- 4. Maximum use of space
- 5. Extendable awning

COORDINATION AND COMMUNICATIONS IN COMPACT PACKAGE.

■ MOBILE SUPPORT

With sophisticated technology, the ELW 1 impresses with mobility for supporting personnel in emergency situations. Suited for every emergency, personnel are prepared and can stay on top of the situation thanks to the ELW 1. Numerous equipment options can be configured and adapted in accordance with the conditions on site.

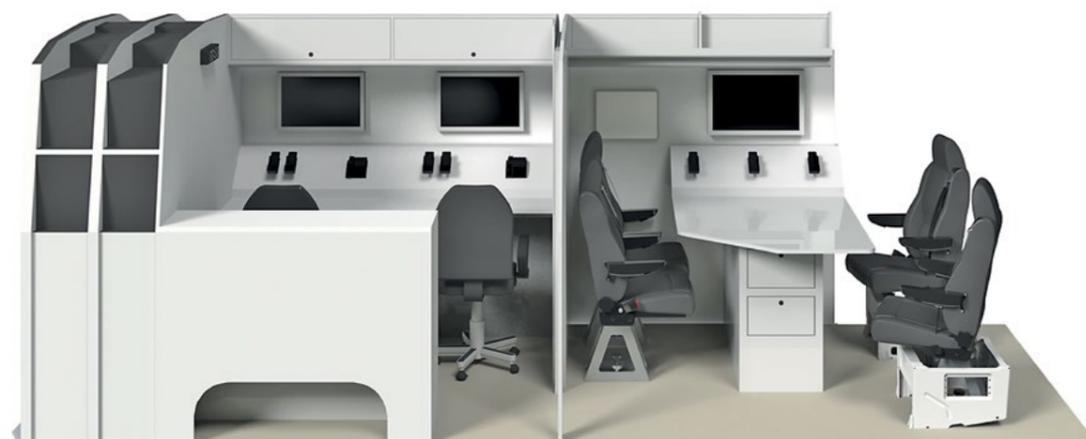

■ COMPACT AND MANEUVERABLE

The compact ELW 1 can get to the appropriate location quickly. All components and equipment are centrally stowed in the rear of the vehicle, ensuring an easy removal.

■ SPACE CONFIGURATION

Space can be configured variably to suit requirements. Benches with a meeting table, several radio and telecommunications devices, as well as special-purpose equipment support personnel in handling the task at hand.

SUPERB TECHNOLOGY IN A COMPACT SPACE.

■ **RADIO ROOM:** Individually adapted meeting area and command center. Outfitted with the latest radio and telecommunications equipment, the ELW 1 is able to network with internal and external security organizations, thus safeguarding targeted tactical operations and communications.

■ **INTERIOR DESIGN:** Thanks to its modular design, the vehicle can be quickly and easily adapted to future requirements.

■ **INCREDIBLY EASY TO USE:** The clearly arranged control panel ensures a quick, logical and intuitive operation.

■ **DRIVER'S CAB:** Ergonomic integration of radio and telecommunications equipment in the driver's cab.

■ **DIGITAL:** Communication is everything – the latest radio and telecommunications technology supports emergency personnel so that they can quickly resolve the situation. Equipped, among other things, with state-of-the-art digital radio and equipment with 2 meter and 4 meter four-channel radio, two command stations with data connection linked to the control center guarantee optimum communications between the individual emergency personnel. Quick organization – quick success.

■ **EVERYTHING WITHIN REACH:** Equipment ergonomically loaded in the vehicle's rear ensures a quick and safe removal.

■ **WHITEBOARD:** Action plans and emergency plans are communicated using the whiteboard and discussed within operations management.

■ **SUFFICIENT SPACE:** The meeting table can accommodate two people.

■ **FLOOR COVERING:** Floor spray covering, with edges extending up on side walls – non-slip and easy to clean.

■ **POWAIRBOX:** The combined power and compressed air supply with automatic eject. Infeed possible with 230 V.

ELW 1

GOOD REASONS TO CHOOSE OUR ELW:

- Safety, durability, and stability thanks to rugged design
- Effective coordination and management of emergency personnel
- State-of-the-art radio and telecommunications technology installed in the vehicle
- Flexible layout: Driver's cab and crew area can be configured individually
- Floor easy to clean thanks to floor covering's edges extending up on walls
