

## **Surveyor and Inspectors**

### **Permanent employment or Freelance job-to-job surveyor & Inspector**

#### **For**

#### **Breakbulk, heavy lift and offshore wind markets**

We are busy, we have a solid core of happy clients and a growing customer portfolio, we are therefore with immediate effect seeking Surveyors & Inspectors to join our team. We are searching for permanent employees on full time and partners on freelance basis, the sooner you can join the better.

We are looking for the best-qualified persons regardless of age and we want to hear from you even if your official work life is completed and you only want to work occasionally.

The position will consist of several tasks mainly focusing on loading and discharge surveys in the heavylift/breakbulk sector and vessel inspections.

The position does due to the nature of the work require substantial traveling activity and requires solid industry knowledge.

The position requires the ability to work alone and make the right decisions fast.

Due to the nature of the work, partly working from home could be an option.

#### **You:**

Have the right training, education and experience, including sufficient time at sea as senior officer to add depth to our internal knowledge base. You could also be having background as a naval architect and/or from a classification.

Have the ability to work independent, in the interest of our clients and Nordic Maritime Solutions.

You can present yourself with a Professional attitude towards co-workers and clients always presenting you and thus the company in a positive, friendly manner with tact and courtesy.

Understand and support that Safety and safe effective operations are the core value of Nordic Maritime Solutions

Must have a valid permission to live and work in Europe and be fluent in English. It would be beneficial if you could speak German.

#### **We:**

Perform Surveys – Inspections and do consulting

We have a strong team with highly knowledgeable crew from all sides of the shipping industry forming a solid competence center that our customers rely on and we build our company around this.

Have Safety and Safe Effective Operations as our core values.

Our clients are most larger organizations and conglomerates internationally based.
